

WaLL.E.D
KONRAD LOHÖFENER, HAGEN SCZECH 2017

The wall lamp is usually available for immediate delivery. Aluminium, stainless steel, plastic. One ball-joint provides flexibility. Removable reflector for use as spot. WaLL.E.D is a minimalistic and linear wall and ceiling luminaire for directional or general lighting. The main body of the fixture is an aluminium profile which serves also a cooling function for the LED module. By clipping on the additional cylindrical reflector, WaLL.E.D can be used as a directional spot. A ball-joint and the angled rod allow for flexible adjustments. The line-voltage LED module can be hardwired without the need for a transformer. Appropriate for both surface or flush mounting.

Light source

LED 15 W, 1300 lm, 3000 K, CRI >90, 50.000 h (manufacturer specification), EEC A+. With built-in LEDs. Light source not exchangeable by user, but by an electrician.

Technical data

For 220-240 V or 110-125 V. 100 volts version available on request. Dimmable.

More info

Available since July 2018. Recommended dimmers: 220 - 240 V, Busch-Jaeger 6523 U; 110 – 125 V: Lutron MACL-153M-WH Maestro 150-Watt.

Colours

Black lacquered
