

**Galactic**  
INGO MAURER AND TEAM 2018

The light shimmers through the curved cut-in outline in a thin white board, which slightly drops towards its center. Galactic primarily provides indirect light reflected from the ceiling and walls. It is particularly beautiful in areas that serve for relaxation, where one unwinds, and enjoys directing one's gaze upwards, as if into the infinity of a vortex. Material: glass fibre, carbon fibre, metal. .

**Light source**  
LED dimmable, 2700 K
