

INGO MAURER

**Signature**  
INGO MAURER TEAM 2023

Inspired by the idea of chance – the uncontrolled form created by a falling cable - the Signature lamp by Ingo Maurer appears like a three-dimensional drawing in a room. The combination of a soft cable, which is connected to a springy, circular structure in simple black, creates the impression for the viewer that it has a coincidental, continuous shape. At the end of this construction, there is an elegant, deliberately inconspicuous lampshade that does not, steal the show from the tangle of cables. It blends stylishly with the overall concept and is thereby not overbearing. With a change of perspective, the way one sees the shape of the lampshade also changes: from a cone to an obliquely inclined rectangle. The lampshade made of anodised aluminium underlines the casualness of the new pendant lamp by Ingo Maurer with its asymmetry and ambiguity and provides a directional light with a GU10 light bulb.

**Light source**  
GU 10, for max. 12 W, suitable for EEC A-G bulbs.

**Technical data**  
For 100–240 Volt.

**More info**  
Also available as a set of 3. Material: aluminium, plastic, rubber.

**Colours**  
Black [optional shade in red and blue].
