

## INVITATION

**Light Space Conversations / Talks, Drinks & Discussions  
at the Ingo Maurer Showroom, Kaiserstrasse 47, Munich  
January 17, 2019 – 7:30 pm, RSVP [info@ingo-maurer.com](mailto:info@ingo-maurer.com)**

What role do light, digital media and emergent digital technologies play in the built environment?

The architect **Filippo Lodi** (UNStudio, Amsterdam) and **Alexander Wiethoff** (LMU Munich) will shed light on this question.

New digital media such as animated light façades, façade projections or interactive light installations currently alter social dynamics and communications in urban space. Within this media architecture aims to merge built form and digital media to augment the existing architectural context with socially relevant information.

In collaboration with

**designfunktion MOROSO<sup>®</sup>**
